### Stainless Steel Surface-Mounted Dual Use Remote Supply Box

**Acorn Stainless Steel Surface-Mounted Dual Use Remote Supply Boxes** are used to supply water to flushing rim drains, can washing drains, shower heads, soap machines, hospital and similar equipment. Transfer valve provides an alternate hose connection. Models with temperature gage are recommended where it is desired to know the temperature of the water being supplied; for example, soap machines and hospital equipment. Temperature gage has a stainless steel case and is calibrated from 0 to 200 degrees Fahrenheit.

**Box** is fabricated from 18 gage, type 304 stainless steel and all seams are continuous welded. It is furnished with four holes on the back for mounting. Wall anchoring hardware by others. Baffle is 22 gage. All exposed surfaces are polished to a satin finish. Door is provided with full length piano hinge, Cam and Cylinder Locks with Key Lock and two keys.

**Control Valves** have cast bronze bodies and feature replaceable cartridges containing all wearing parts including the seat. Exposed valve parts are polished chrome-plated. Valves have a screwdriver Stop in each supply behind removable baffle, which permits servicing without shutting down the water supply. The transfer valve diverts water from the remote line to the 3/4" hose connection, or vice versa.

**Vacuum Breaker** prevents contamination of the potable water supply. It is atmospheric type and conforms to the requirements of ASSE Standard 1011 and IAPMO code. Supply and outlet connections are 1/2" NPT and are securely anchored to the box so internal piping will not be damaged during installation.

### GUIDE SPECIFICATION

Provide and install Acorn Surface-Mounted Dual Use Remote Supply Box model (specify model number) fabricated from 18 gage, type 304 stainless steel with full length piano hinged door. Door is key lock operated. All exposed stainless steel surfaces including interior stainless steel baffle shall be polished to a satin finish. Control handles shall be polished chrome-plated. Control valve shall be cartridge-operated type with individual screwdriver operated Stop. Diverter valve shall have code approved vacuum breaker. Temperature gage shall be calibrated from 0 to 200 degrees Fahrenheit.
