### Fully Flanged Shower Bases

**Shower Base** is an attractive, easy to maintain, spacious shower receptacle. It is designed for durability and ease of installation. **ACORN Terrazzo-Ware™** precast shower bases provide flexibility in configuration and size as required by the design of the building and the specific installation. Custom sizes and colors are also available.

**Fully Flanged** on all sides of the fixture allows the installer to construct tiled walls and a tiled threshold. The sides have galvanized tiling flanges which extend at least 1 ½" above the 1 ¼" wide shoulder, and 2 ½" wide threshold.

**Construction** is one piece, precast terrazzo composed of marble chips cast in Portland cement to provide a compressive strength of at least 3,000 PSI seven days after casting. The shower base surface is ground smooth and sealed to provide years of service.

**Integral Drain** is supplied with a removable, stainless steel grid strainer and provides for an inside caulked connection to a 2" pipe. The shower base has coved corners and is pitched to the drain outlet to provide positive drainage. A vandal resistant strainer is optionally available.

### GUIDE SPECIFICATION

Provide and install an **ACORN Fully Flanged Shower Base** (specify model number and options). Shower Base shall be made of precast terrazzo to produce a compressive strength of at least 3,000 PSI seven days after casting. Base shall be ground smooth and sealed. No air holes or pits shall be allowed on the finished surface. Base shall have coved corners and be pitched to the drain outlet for positive drainage. Integral drain shall have a stainless steel strainer and provide for an inside caulked connection to a 2" pipe. The manufacturer will provide to the installer the necessary installation instructions.
