

## Option -MVCFV

### Time-Trol Flush Valve -

Provides an Acorn Time-Trol System for limiting frequency of flush valve operation through electronic control of a solenoid flush valve. Controller includes 10 preset lockout intervals ranging from 1 second to 9 minutes easily adjustable with a dial selector knob. The pushbutton is vandal-resistant and requires less than 5 pounds to activate valve. MVC controller can be remotely located up to 100 feet from the fixture.
