Terrazzo Reduced Height Mop Sink

ACORN Terrazzo-Ware™ precast mop sinks provide flexibility in configuration and size as required by the design of the building and the specific installation. Mop sinks are attractive, durable fixtures designed to be easy to install and maintain. Fixtures are available in 10" and 6" heights in a variety of square and rectangular sizes. A 6" high neo-corner configuration is optionally available.

Construction is one piece, precast terrazzo composed of marble chips cast in Portland cement to provide a compressive strength of at least 3,000 PSI seven days after casting. The mop sink surface is ground smooth and sealed to provide years of service.

Integral Drain is supplied with a removable, stainless steel grid strainer and provides for an inside caulked connection to a 3" pipe. The mop sink has coved corners and is pitched to the drain outlet to provide positive drainage. A beehive dome strainer is optionally available.

Shoulders are pitched to provide drainage and pitched toward the inside without caps exposing the natural terrazzo finish. Stainless steel or vinyl bumper guard accessories are available to provide protection.

Accessories to complement and complete the installation of the mop sink include:

- chrome finish faucets
- 36" hose to reduce splashing with wall hanger to support the hose
- mop hanger for easy storage of the mop over the sink
- rubber drain gaskets for easy installation of the fixture
- stainless steel wall guards to protect sensitive walls from splashing water
- tiling flanges for simple, flexible field installation
- stainless steel or vinyl bumper guards

GUIDE SPECIFICATION

Provide and install an **ACORN Reduced Height Mop Sink** (specify model number and options). Mop Sink shall be made of precast terrazzo to produce a compressive strength of at least 3,000 PSI seven days after casting. All exposed surfaces shall be ground smooth and sealed. No air holes or pits shall be allowed on the finished surface. Sink shall have coved corners and be pitched to the drain outlet for positive drainage. Integral drain shall have a stainless steel strainer and provide for an inside caulked connection to a 3" pipe. The manufacturer will provide to the installer the necessary installation instructions.
