Retro-Pak Replacement

The Acorn Retro-Pak has been designed to completely replace the operating mechanism on Bradley FC model Washfountains.

BRADLEY MODELS: AFC, BFC, HFC, OFC, CFC, CFC-B, CFC-H, CFC-O, KFC, KFC-B, KFC-H, KFC-O.*

The Acorn Retro-Pak replaces the sprayhead, soap dispensing system and valve assembly. The Retro-Pak sprayhead and stanchion assembly is fabricated entirely of heavy gage, type 304 stainless steel with a satin finish. Acorn's sprayhead is designed to contain the pushbuttons, individual spray nozzles and optional soap system. The sprayhead assembly is mounted to the existing bowl, using tie rods and supporting castings. Gasket for applicable bowl material is included.

The Valve Assembly, including an ASSE 1016-1996/1070 compliant temperature/pressure balancing mixing valve and the individual, non-hold open metering valves are arranged to be located within the existing pedestal. A mounting bracket is included to accommodate wall or floor mounting.

Valves are Air-Control pneumatically operated, pushbutton type using atmospheric air. Pushbutton is vandal-resistant and requires less than 5 pounds to activate valve. Valve is metering type with non-hold open feature. Timing is adjustable from 5 to 60 seconds.

Regularly furnished items include sprayhead, sprayhead stanchion, upper and lower support castings, tie rods, gasket, an ASSE 1016-1996/1070 temperature/pressure balancing mixing valve, strainer checkstops and Air-Control metering valves (one per washing station).

GUIDE SPECIFICATION

Provide and install Acorn Retro-Pak (specify model number and options) with individual Air-Control non-hold open metering valves and spray nozzles. Sprayhead and stanchion to be heavy gage, type 304 stainless steel with a satin finish.
