

Model S0000-FPV

Freeze Protection Valve

SPECIFICATIONS:

Model S0000-FPV is a freeze protection valve that will initiate flow when the thermostatic actuator senses a temperature of 35°F (1.7°C). It is typically piped to a drain and thereby purges the cold water and brings fresh water to the valve/fixture to prevent freezing conditions. The valve will remain open until it senses a water temperature of 40°F (4.4°C) or more at which point it will automatically close (resetting itself).

Model: S0000-FPV

OPTIONAL ACCESSORIES:
