Detox Toilet - Blowout Jet Type - Remote Flushing

Recommended for installation in detoxification cells (drunk tanks), padded safety cells, isolation cells and similar locations where conventional toilet may present a hazard to the inmate. Location for toilet should be out of the traffic pattern and as close to the remote located flush valve as practical. Flush valve and a Hot and Cold Hose Box should be mounted in the wall outside the cell. It is recommended that the flush valve be mounted in a flush valve access panel, Acorn model 2898 or flush valve recessed wall box, Acorn model 2803-1 (refer to Dura-Ware Accessories Section for details). Floor should be sloped to drain into the toilet with waste line cleanout provided in the pipe chase.

The exclusive Detox grate design is vandal-resistant and has no sharp edges. Toilet features:
(1) Welded bars. Removable bar directly over waste outlet is secured with tamper-resistant screws.
(2) An integral sloping rim which permits solids to be washed into the receptor.
(3) A receptor with coved corners. Water covers the entire receptor bottom area.
(4) A continuous flushing rim that washes all four walls with a jet action flush which completely evacuates all solids.

Fixture is fabricated from 14 gage, type 304 stainless steel. Receptor bars are 3/8" diameter. Interior has a matte finish. Toilet has 1" NPT male flushing connection and requires a minimum of 35 PSI flow pressure. Trap will pass a 2-1/8" ball and has a 3-1/2" seal. Toilet waste outlet is 2-3/8" O.D. plain end.

GUIDE SPECIFICATION

Provide and install Acorn Penal-Ware Detox Toilet (specify model number). Fixture shall be fabricated from 14 gage, type 304 stainless steel and shall have a continuous 360 degree washdown flushing rim. Bar grate shall be 3/8" diameter bars welded in place, except bar over waste outlet, which shall be removable and secured in place with two tamper-resistant screws. Receptor shall have coved corners and the bottom area shall maintain a minimum water surface of 8" x 12" x 2" deep. Toilet waste outlet shall be 2-3/8" OD plain end and trap shall pass a 2-1/8" ball.
Notes:

1. Removable bar.
2. Integrally welded bars.
5. Finishing flange.
6. Flushing inlet connection.
7. Toilet waste connection.
